

KORDIA™ PROJECT DELIVERY SOLUTIONS

Kordia™ specialises in the successful delivery of technology projects.

Technology projects are notoriously difficult to deliver; involving large scale investment, tight timeframes and technical complexity. Significant delays, cost overruns and a failure to deliver the intended business benefits are common for project teams that lack experience in this area.

Kordia™ has been delivering projects in the telecommunications, broadcast and IT sectors, both in New Zealand and overseas for over 30 years. Our Project Management Office offers a range of services from project audits to full outsourcing, we have a proven track record and have been successful in winning the Computerworld Excellence Award for most successful project implementation.

KORDIA™'S PROJECT DELIVERY SERVICES INCLUDE:

- PROJECT MANAGEMENT AND DELIVERY
- PROJECT MANAGEMENT AND ADMINISTRATION OUTSOURCING
- HEALTH CHECKS AND AUDITS
- PROJECT AND PROGRAMME OFFICE
- PROJECT RESCUE
- PROJECT MANAGEMENT TRAINING

PROJECT MANAGEMENT AND DELIVERY

Faster, smarter delivery of products and services to the market gives businesses the edge in a highly competitive market. Using Kordia™'s people, tools and techniques you can turn your revenue-generating ideas into reality. Kordia™ is able to offer full turn-key project delivery.

PROJECT MANAGEMENT AND ADMINISTRATION OUTSOURCING

Outsourcing provides our clients with access to a national network of project management professionals with extensive industry knowledge. Clients have the flexibility and knowledge to work quickly, increasing their resources and retaining their internal capability as required.

HEALTH CHECK AND AUDITS

Our project health checks provide a detailed, factual and independent assessment of the state of a project. The information gathered helps keep projects focused on deliverables and assists with successful delivery of future projects.

PROJECT AND PROGRAMME OFFICE

It's a well established rule that effective and efficient PMOs drive project delivery and performance but finding the skills and time to build an effective PMO is the challenge facing many managers today. Kordia™ has the skills, expertise and established methodology to help you set up your own PMO quickly and efficiently.

PROJECT RESCUE

Failed projects can impact on a business's bottom line, damage its reputation in the market and, ultimately, affect shareholder value. We investigate the issues surrounding project failure, helping drive rapid recovery of a failing project.

PROJECT MANAGEMENT TRAINING

Kordia™ offers a range of training courses, from the fundamental to specific aspects of project management.

Our approach draws heavily on the Project Management Institute's internationally-recognised project delivery process. We focus on nine key knowledge areas:

- Communications management
- Time management
- Cost management
- Risk management
- Procurement management
- Resource management
- Scope management
- Project integration management
- Quality management
